

Rocket Mass Heating (RMH) Systems

Proven Rocket Stove Technology + Heat-Retaining Biomass - Adobe Cob
Maintains heat 12-48 hours AFTER fire goes out!

- 25-80% less wood/combustibles (kindling size!) than wood stoves
- For homeowners or troops in the trenches
- Uses: cooking, baking, drying, or heating
- Independence from power grid
- Recycle from war's destruction
- Modify to meet your needs
- Business potential
- Easy to build

Rubble Wanted!

Recycled bricks, concrete chunks, steel barrels, ducting, metal, rocks, and more can be used.

From rubble to heat-holding mass

Cost? almost \$0 - \$300 for simple designs

Typically, it's a J-tube configuration, insulated.

It burns all the smoke, all of the fuel that is present in the wood is burned completely
